A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

2. Claim 29 is rejected under 35 U.S.C. 102(e) as being anticipated by Agarwal et al. (U.S. Pat. 6277687).

Agarwal et al. disclose the method for forming a container capacitor, comprising:

providing a cup-shaped bottom electrode 38 (fig. 3);

providing an insulating layer 26 around and in contact with an exterior surface of the cup-shaped bottom electrode;

masking a first partial circumferential portion of the insulating layer (masking layer 44, fig. 4);

etching a second partial circumferential portion of the insulating layer from a partial circumferential part of the exterior surface to expose a part of the exterior surface (fig. 5);

depositing a dielectric layer 56 on the part of the exterior surface; and
